

ROLLINER

ROLLINER

A new and revolutionary wire feed conduit. This new approach to wire feeding eliminates problem wire feeding, providing less down time.

The wire runs through rolls that are shifted by 90°

Part Number:
400-RL-XFT

OTHER ADVANTAGES:

- Stable arc due to precise feeding
- No liner wear, longer life
- Feed longer distances
- No damage to wire electrode
- Easy set up and connection
- Extremely low pull force
- No additional feed motor required
- Light weight
- Less maintenance
